

# SC-TSE1228-3S

## 3-Side emitting Silicon Neon

Available colors

## Features

- High brightness 2835 SMD LED (single color & RGB color)
- CRI80 or CRI90
- High efficiency up to 130LPW
- 12\*12mm Dimension & Minimum bending radius can be 60mm
- Top-View & 3-Side emitting
- Dot-free illumination and high uniformity
- UV-resistant high quality silicon material
- Extrusion process & injection moulding for end cap make IP67
- Special window-design makes cutting convenient and easy
- Providing accessories for cutting and installation

## Application

- Outdoor contour/boundary lighting,
- Building contour decoration lighting.

## Technical parameters

- \* Note : 1. The above data is the testing result of 1M standard product;  
 2. The power and lumens of output data can be vary up to  $\pm 10\%$ ;  
 3. The above parameters are all typical values.

\* Note: There will be CCT deviation for white color after the silicon extrusion, below is the table for your reference.

CCT Deviation table			
Part number	Color	CCT for LEDS(real tested data)	CCT for IP67(real tested data)
SC-TSE1228-3S-128-WW-24V	WW	2983	2908

## Installation diagram

### Installation operation

1. Fixed the clip in the place where the neon flex installed, as shown in Figure 1

Figure 1

2. Install the neon flex into the clip, the installation is complete, as shown in Figure2

Figure 2

### Cutting operation

1. Cut along the cutting line with scissors, as shown in Figure 3.

Figure 3

2. The plug will be filled with glue, and put the neon flex into the plug, the installation is complete, as shown in Figure 4:

Figure 4

3. Cut off the adhesive on the back of the PCB to reveal the welding points, as shown in Figure 5

Figure 5

4. Use the soldering iron to solder the wire, as shown in Figure 6

Figure 6

4. Put the plug encased into the line, and repeat Figure 4 gluing steps, and then insert the neon flex into the plug, the installation is complete, as shown in Figure 7

## Installation requirement

- The LED strip and accessories can't be squeezed or folded.
- PCB conductive parts can't be damaged when installation.
- Installation must conform to electrical safety standard. The LED strip can only be installed by professionals.
- Ensure power supply transform operating load with transformer.
- When install on metal or conductor surface, insulation protection need to be provided to the contact area.
- Observe positive and negative polarity, ensure correct connection to avoid damaging LED strip.
- When installation, please prevent static electricity.
- The product need anti-corrosion environment, such as, avoiding damp, water drop or other adverse elements.
