

Color adjustable flat panel light

Description

LED flat panel light is the latest new generation of edge-lit lighting fixture, it has the uniform and smooth lighting effect and elegant appearance design. And each fixture is 3 SKUS in 1 unit design, so the users can easily set the color temperature that they want.

Features

● Color temperature setting: 3000K, 4000K, 6000K

One piece color adjustable and panel light=3 pcs regular panel light now, it can save the shipping time, warehouse space and your stock cost.

● Visual Uniformity

Using high quality LGP with silk printing technology, the light uniformity rate is greater than 85%. No yellow edge and dark area, prefect lighting effect.

● High efficiency up to 80-90LM/W, DLC standard and Premium version for optional

High transmission LGP (more than 90%), high lumen LED efficacy paired with high power factor drivers

● Flicker free LED driver and flickering driver for optional

Constant current design, PF>0.9, THD<15%.
Short circuit, open circuit protection, and 1KV surge protection.
0-10V, DALI, Triac driver also can work with this panel light.

Three installation options

● Each panel with standard clips for recessed and suspending installation. Optional surface mounted kit available.

Application

LED Square Panel Light can be used in hotels, meeting rooms, factories, offices, commercial purposes, residential institution buildings, schools, hospitals, places which needs energy saving and high color rendering index lighting.

595*1195mm

Installation drawing

Recessed installation

1. Drill Holes

2. Swipe the DIP switch on the back to position of corresponding temperature(for DIP switch version)

- Switch the color temperature switch according to needs to switch color temperature to corresponding position

3. Connect the power

4. Put the lamp into the ceiling

Surface Installation

1. Tools

2. Accessories

3.Mark position line

- Mark position line according to distance and dimension of hole position of ceiling frame

4.Drill holes

- Drill holes with electric hammer drill according to position line

Suspending Installation

5. Install rubber plug

- Hammer rubber plug into drilled hole

6. Fix ceiling frame

- Fix ceiling frame with screws

7. Connect ceiling frame with plastic corner brace

- Connect ceiling frame with corner brace to ensure seamless connection

8. Swipe the DIP switch on the back to position of corresponding temperature (for DIP switch version)

- Switch the color temperature switch according to needs to switch color temperature to corresponding position

9. Install lamp and connect ceiling frame with corner brace

- Push the panel light into the track of ceiling frame
- Connect ceiling frame with corner brace to ensure seamless connection

10. Installation finish

Surface Installation

● Installation accessories

Installation steps

1. Disassembling figure

- Unscrew wire clamp
- Unscrew T-shape bolt
- Unscrew headless screw on suspensent rope Y and with slotted screw,take out suspensent rope of the Y end

2. Installlation diagram

3. Drill a hole

- Drill a hole with electric hammbur drill

4. Install rubber plug

- Hammer rubber plug into drilled hole

5. Fasten ceiling cap

- Unscrew ceiling cap
- Thread screw through ceiling cap,and fasten it into rubber plug with with cross screwdrive

6. Install wire clamp

- After the screw is fixed,thread the disassembled wire clamp through hole in the ceiling cap,then rotate it right-handend to tighening it
- Adjust rope length

7. Install suspensent rope on Y end

- Thread suspensent rope throught inner hole of lamp bracket
- Repeat step1,install another suspensent role on Y end on adjacen side of panel light

8. Fasten suspensent rope on Y end

- Thread Y-end suspensent rope throught wire clamp and bolt of clamping rope,and ightening it;the thread head can't thought the clamping rope too much,and about 3mm is ok

9. Swipe the DIP switch on the back to position of corresponding temperature(for DIP switch version)

- Switch the color temperature switch according to needs to switch color temperature to corresponding position

10. Fix suspender rope on fixed end

- Twist T-shape bolt between wire clamp on Y end, repeat above step, installation finish

How to choose the color temperature

Option one: Adjust the 3-position slide switch with your fingers for different color temperature.

Option two: Change the CCT by standard wall switch who has the on/off push button: push the ON/OFF button in 3 seconds, it will change colors, push one time, the color will change accordingly. If stay more than 3 seconds after you close the light, it will remember the last color you chose.

Factory setting: push the ON/OFF button 7 cycles, and each cycle no more than 3 seconds, the lamps will restore to factory settings.

Notice

- Please read the specification first, to make sure the service environment matches the condition in the specification before using.
- Please confirm the applicable power supply before using.
- Make sure the switch of product is off before connect to the power supply to prevent electric shock.
- Operation against rules may damage your property even harm to your personal safety.
- Preliminarily estimate required quantity of LED panel lights, then according to the power rating of single panel light to figure out the total power and design power supply plan.
- Dangerous high voltage, Non-professionals are not allowed to maintain the products.
- If the exterior flexible cable or wire is damaged, it must exchange by the supplier, its agent or other similar qualified personnels to avoid dangers.
